Anytime stress validity

Violation-rate upper limits by stress condition and method

Ignorable-delay anytime reference
Repeated-static monitoring negative control
Time-uniform confidence sequence construction
Time-uniform observable-law projection
TrajCert

exact one-sided 95% upper limit on violation rate

0.08
0.06
0.04
0.02
0.00

acceptance limit = 0.06
anytime δ = 0.05

High unresolvedness stress
Independent resolution control
Low error-prevalence stress
Minimum-information completion stress
Near-certification risk-budget stress
Near-degeneracy stress
Thirty-two-band resolution stress
